The creation of our paper weave wallpaper begins with the meticulous production of washi paper, a process rooted in tradition and sustainability. The raw material—wood pulp—is carefully sourced and managed both domestically and internationally to ensure quality and responsibility.

Once prepared, the washi is finely cut, expertly twisted into threads, dyed in rich, vibrant colors, and skillfully woven into beautiful, textured wallpaper. This intricate craftsmanship results in stunning paper weave designs that offer a unique blend of natural warmth and refined elegance, perfect for adding a sophisticated touch to any interior
